

**HealthChain**

# Chicago facility

A new HealthChain certified, fully GxP compliant, temperature-controlled space has just opened for business in Chicago. Located eight miles from Chicago O'Hare international airport (ORD), the 21,000 sq ft expansion of our Chicago facility has been designed specifically for healthcare products.

# HealthChain

## Features and services:

- Temperature-controlled cross-dock, airfreight in-transit warehouse, pallet build and breakdown, providing end-to-end temperature-controlled solutions.
- Shipment temperature monitoring and visibility, using wireless sensors, via myKn.
- Envirotainer QEP and CSafe Equip certified (30 active ULD charge stations).
- Preparation of transport packaging (active and passive), including dry ice supply, PCM/Gel pack supply, or reconditioning and temperature-data-logger activation and batteries for active, temperature-controlled ULDs.
- Hygiene program, 24/7 temperature monitoring, CCTV, controlled access.
- Bonded facility.

## Specifications of the three temperature-controlled areas:

**+15°C to  
+25°C**

**receiving dock and  
precondition zone**

488 sq m (78 ft by 58 ft)  
Temperature set point: +20°C

**+15°C to  
+25°C**

1043 sq m (78 ft by 144 ft)  
Temperature set point: +20°C

**+2°C to  
+8°C**

420 sq m (73 ft by 72 ft)  
Temperature set point: +5°C

### Location

1501 Devon Avenue  
Bensenville  
Illinois 60106  
USA
