

Road Logistics

# Total Logistics Management (TLM)

Optimize and manage your supply chain with technology-based solutions customized for your one-of-a-kind business.

# Total Logistics Management

Moving freight is only one part of the process. You're also juggling how to reduce costs and lead times, manage shipping lanes and assess carriers. Leave your supply chain to us and focus on what matters most—your customers.

## 20/20 vision

Achieve more control over your shipments and operations, at every touchpoint, with an integrated Transportation Management System (TMS) and EDI solutions.

## TMS Powered

Create more inter-departmental and operational connectivity. With our TMS, you have route optimization, carrier management and freight bill audit and pay all in one platform.

## Ready for the unexpected

With a dedicated road logistics team, you stay ahead of disruption. We look at potential fluctuations in freight costs, spikes in demand and capacity limits to ensure your supply chain readiness.

**Let us drive success  
right to your doorstep.**

## The smart money is on TLM

Reduce your cost per pound—and overall spend—with TLM's route optimization, load consolidation, contract negotiation and cross-dock solutions.

## Proactive monitoring

TLM services prevent delays and additional costs with pre-emptive measures. We carefully monitor your shipments and intervene whenever disruption happens en route.

## Pursuing higher performance

In an ever-changing industry, you want to stay ahead of the curve. So why improve your operations just once? Through KPIs, analytics and regular reporting, we're always looking for ways to make your supply chain more efficient.
